

JELCO

8' Uniline Rope Safety

Jelco's 8' Uniline Rope Safety is made with a straight lay, polyester core, wrapped with a red wear indicator and covered with a neoprene impregnated polyester jacket. The Uniline material is extremely durable and wear resistant. The ruggedness of the material means a plastic tube cover isn't necessary to protect the device from excessive wear.

Features

- 8' long. Will allow you to pass almost 4' without having to safety back in.
- The stiffness of the material allows it to coil up much like cowboy rope, when not in use.
- This helps reduce the trip hazard and need for an additional ditty bag.

Available Models

- 13082: 8' Uniline Rope Safety. (Image above.)
- 13085: 8' Uniline Rope Safety featuring a double-locking swivel snap hook.
